

T.I.P. MULTIPLIER EVENT SLOVENIA

On December 14, 2022 we had a public evening event with the local performance with a subsequent presentation of the process and project methods, along with the solemn certificates award ceremony. Good 30 people attended, mostly high school teachers and youth workers, some youth and general public as well.

For the multiplier event some of the local trainers and young participants formed a new theater group, and through 4 intense half-day workshops and rehearsals in November and December created a new theater performance called *the Rhythm of Existence*. They built the performance with the combination of the innovative project methods they were learning throughout the year, and performed it for the first time at the multiplier event.

Performers and participants of the project presented their experience of the process and what they learned to the public after the performance, in a panel with one of their mentor Manca Setinc Vernik. We presented the Accessibility and Inclusion Pack with a lively discussion with the public also informally after the official part of the programme.

Not only the professional video of the performance was created, but also an activist short video with the messages on Inclusion:
